Sustainability & Social Innovation  
The Rabobank Group

**Jane Nelson**

Director  
Business Leadership & Strategy  
International Business  
Leaders Forum

Sustainable development requires new generation partnerships.

Unleashing the power of partnerships between business and the community remains one of the great challenges for leaders in business, government and non-government sectors. Progressing from stakeholder dialogue to practical partnerships will require new thinking and new behaviours in each sector.

Four international best practice leaders will join representatives of Australian and New Zealand business, government and non-government organisations to develop the business case for investing in partnerships.

### Note these dates in your diary NOW
